Key Largo, FL - November 8, 2021: The Consortium For Waste Circularity (CWC), the printing and packaging industry authority on circularity of all waste, announces today that Tempo Flexible Packaging is joining the Consortium For Waste Circularity as a founding sponsor. CWC is aligning the printing and packaging industry toward a path of full circularity where all waste is converted to the valued end product of eco-methanolTM for the production of plastic. CWC funds R&D, education and outreach at the University of Florida for Advanced Recycling. For more information visit the website: wastecircularity.org

“Tempo Flexible Packaging is proud to support the efforts of the Consortium for Waste to Syngas Circularity. The approach to use science based solutions combining advanced technology and the sociocultural factors to achieve circularity aligns with our Vision for a world without packaging waste”, said Tempo’s Optimist & CEO Leonardo Giglio.

About Tempo Flexible Packaging: In 1970 Tempo Plastics was founded by Joe Giglio and John Paterson serving the Southern Ontario market in Canada. Since that time, the recently rebranded, Tempo Flexible Packaging has grown and today serves North America and manufactures upwards of 1 million flexible packages daily.

Tempo is focused on food contact packaging, with monolayer and laminated multi-layer pouches, bags and roll stock. Tempo is continuously investing in technology to deliver high quality process printed graphics to various North American product markets. This is achieved within the structure of a global food safety system and an internally recognized quality management system of ISO 22000.
