CONSORTIUM
FOR WASTE CIRCULARITY

Supporting All Waste Becoming An Endless Loop Of Circularity

Key Largo, FL - October 21, 2021: The Consortium For Waste Circularity (CWC), the printing and packaging industry authority on circularity of all waste, announces today that Sixto Packaging is joining the Consortium For Waste Circularity as a founding sponsor.

CWC is aligning the printing and packaging industry toward a path of full circularity where all waste is converted to the valued end product of eco-methanol™ for the production of plastic. CWC funds R&D, education and outreach at the University of Florida for Advanced Recycling. For more information visit the website: wastecircularity.org

“We want to be part of the genuine solution, to follow the science, and not be just another green washer”, said Sixto Packaging Director, of Sales Felipe E. Sixto. “Becoming a sponsor of the Consortium for Waste Circularity fits our family values. We as a society, cannot continue to bury trash in landfills, burn it, or worse, throw it into our oceans. Something must change. And although we support reducing and recycling efforts, supporting CWC to create circularity for all waste is the overarching goal Sixto Packaging believes is needed to create a viable and truly sustainable circular economy. Transforming waste into eco-methanol that can produce virgin plastic again is the future of waste management and the packaging industry. CWC brings several pieces of this puzzle together.”

About Sixto Packaging:

Sixto Packaging is a family-owned flexible packaging converter, dedicated to providing the highest level of quality products, outstanding customer service and superior reliability for over 50 years. The company was founded by Felipe and Carmen Sixto and their three sons, Felipe, Emilio, and Andres. Today, the company includes four generations of the Sixto family in its daily operations out of their state-of-the-art facility in Miami, FL.

Sixto Packaging has a vertically integrated approach to the manufacturing of flexible packaging. With its investment in technology, training of personal and key strategic partnerships, Sixto Packaging services the fresh produce, frozen foods, snack food, coffee, pet food, and other specialty markets. Their capabilities include up to 10 color flexographic printing, lamination of film, paper and foil, specialty coatings of films, in addition to manufacturing stand up pouches, coffee bags, zippered innolok roll stock, and laser micro perforations.
